IEEE DBIT
Report on – ROCKET LEAGUE

Title: ROCKET LEAGUE
Date: 24TH & 25TH MARCH
Time: 12 PM – 4 PM & 12 PM – 2 PM
Venue: BASKETBALL COURT

Target Audience: OPEN FOR ALL

No. of Participants Present: 22

No. of Girl Participants Present: 7

No. of Boy Participants Present: 15

Organising Department / Committee / Authority: IEEE-DBIT
Faculty Coordinator: Ms Freda Carvalho

Objectives:

- To introduce participants to the working concept of Bluetooth-controlled robots in a competitive setting.
- To enhance problem-solving, precision, and control under pressure.
- To promote teamwork, sportsmanship, and technical curiosity among students.
- To make robotics approachable and enjoyable through interactive gameplay

Outcomes:

- Improved understanding of control logic and wireless operation of bots.
- Development of teamwork, coordination, and focus during the rounds.
- Exposure to real-time challenges involving speed, direction, and accuracy.
- Strengthened enthusiasm for robotics and automation through a playful approach.

Detailed Report:

The Rocket League competition, organised by the IEEE DBIT Core Team under Colosseum 2026, was an innovative and engaging event that combined gaming concepts with real-world robotics. It provided students with an opportunity to experience Bluetooth-controlled RC cars in a competitive football-style arena, emphasising teamwork, coordination, and strategic thinking. The event witnessed enthusiastic participation and successfully demonstrated how technology can be both educational and entertaining.

- The IEEE team developed Bluetooth-controlled cars using Arduino Uno and HC-05 modules to ensure uniform performance and fair play. Participants were given a brief demonstration on controlling the cars through a mobile application and were introduced to the rules and scoring system before the matches began.
- A total of 6 teams participated on Day 1, competing in a structured format. Matches were initially played in a 3 vs 3 format, followed by a 2 vs 2 tiebreaker in case of a draw, and penalty shootouts if required. Based on their performance, 3 teams qualified for the final round.
- The final round on Day 2 followed a triad league format, where the top three teams—Team Jaeden, Team Aarya², and Team Aditya- competed against each other. Each team played five rounds against the others, and the winners were decided based on the number of victories. In case of a tie, a golden kick was used as a tiebreaker.
- The matches were highly competitive and engaging. Team Jaeden emerged as the winner after securing victories against both competing teams, followed by Team Aarya² as the runner-up and Team Aditya securing third place.
- The event created a vibrant and energetic atmosphere, encouraging collaboration, quick decision-making, and technical engagement among participants. Certificates and recognition were awarded to the winning teams.
- The competition concluded successfully, highlighting the importance of innovation, teamwork, and practical application of technology, leaving participants with a memorable and enriching experience

The feedback collected from participants reflects an overall positive response towards the Rocket League event. A total of 8 responses were recorded, with participants primarily from SE (50%) and TE (50%), and a majority belonging to the EXTC branch (50%), followed by Comps (25%), and IT and Mech (12.5% each). The overall event rating was highly favorable, with most participants rating the event between 7 to 10, indicating strong satisfaction. Similarly, the arena and setup received good ratings, mostly ranging from 6 to 10, suggesting that the field design and gameplay experience were well appreciated.

In terms of engagement, participants found the matches exciting, with a majority rating the excitement level between 7 and 10. Additionally, many respondents expressed willingness to participate again in similar events, with the highest number of responses leaning towards the top end of the scale, highlighting the event's success in creating interest and enthusiasm.

Constructive feedback pointed out a few areas for improvement, such as delays in event timings, suggesting better time management. Some participants recommended conducting the event in an indoor setting to avoid environmental disturbances like obstacles on the field. A few also suggested improving the performance and pre-checking of the RC cars to ensure smoother gameplay. Despite these minor concerns, participants appreciated the technical team's support and overall event execution, indicating that the event was well-organized, enjoyable, and impactful.
