IEEE-DBIT CS STUDENT BRANCH

“Open-Source Contribution Workshop”

Topic: “Open-Source Contribution and GitHub Basics”

Date: 24th July, 2025

Time: 11:15 am to 1:00 pm

Venue: Seminar Hall, A wing, Don Bosco Institute of Technology, Kurla, Mumbai 400070

Speaker: IEEE-DBIT student chapter: Krushnali Munekar, Shariya Ansari

Support team: Piyush Mistry, Moin Khan, Kartik Dandelia, Prathmesh Kurdekar, Zubia Sarang, Aryan Arde, Nirmity Bait, Pritika Mediboina, Dhruv Tare

No. of Participants Present: 69

No. of Girl Participants Present: 25

No. of Boy Participants Present: 44

Objective:

- To introduce students to the concept and benefits of Open-Source contribution.
- To demonstrate hands-on steps for making their first Open-Source contribution using Git and GitHub.
- To empower students with basic Git commands, collaboration workflows, and contribution best practices.

Outcome:

- **Version Control Skills:** Students understood the importance of version control using Git.
- **Practical GitHub Knowledge:** Learnt how to fork repositories, clone them, create branches, and make contributions.
- **Hands-On Contribution:** Students made their first pull request on a real Open-Source repository.

DON BOSCO INSTITUTE OF TECHNOLOGY

DEPARTMENT OF ELECTRONICS AND TELECOMMUNICATION

IEEE-DBIT CS STUDENT BRANCH

- **Exposure to Open-Source Culture:** Understood the do's and don'ts of contributing to open projects.

Description:

IEEE DBIT CS Student Chapter organized a hands-on “**Open-Source Contribution Workshop**” on 24th July 2025 for students of all departments.

The session began with a brief presentation outlining the workshop flow, followed by an introduction to Git (a local version control tool) and GitHub (a platform for online collaboration and code sharing).

The theory session explained:

- What is Open-Source and why it matters
- Benefits of contributing to Open-Source: from learning and networking to job opportunities
- The right way to contribute, including reading the README and CONTRIBUTING files
- Common mistakes (how *not* to contribute, such as spamming or irrelevant PRs)
- Steps involved in contributing to Open-Source (as a structured Git workflow)
- Live examples of successful contributors from student communities
- Opportunities available through programs like GSoC, Hacktoberfest, and Outreachy

Next, the session shifted to a live demonstration of the GitHub workflow using the following steps:

1. Forking the repository
2. Cloning it locally
3. Creating a new branch
4. Editing the contributor's file

DON BOSCO INSTITUTE OF TECHNOLOGY

DEPARTMENT OF ELECTRONICS AND TELECOMMUNICATION

IEEE-DBIT CS STUDENT BRANCH

5. Staging the changes with git add
6. Committing them with a descriptive message
7. Pushing the branch back to GitHub
8. Creating a Pull Request (PR)

Basic Git commands such as:

git clone, git checkout -b, git status, git add, git commit -m, git push, and how to create a PR on GitHub were all demonstrated live.

Hands-On Session:

Each student forked a sample GitHub repository and was guided through:

- Editing a markdown file (Contributors.md)
- Using Git commands on their machine
- Sending their first pull request
- Understanding Git status reports and commit messages

This gave students practical exposure to tools that are fundamental in real-world software development and collaboration.

Pacing of the Workshop:

Comments on the workshop: -

What was the MOST valuable part of the workshop for you?

1. The actual use of Open-Source
2. Hands on learning
3. Technical start for Git
4. That it taught something that everyone needed to know
5. I made my first contribution, but I had errors

DON BOSCO INSTITUTE OF TECHNOLOGY
DEPARTMENT OF ELECTRONICS AND TELECOMMUNICATION
IEEE-DBIT CS STUDENT BRANCH

6. Learning about git and GitHub, open-source platforms
7. learning about Open-Source, willing to code more
8. It was about the basic commands of GitHub
9. Helpful nature and explained well all concepts
10. SENDING MY FIRST PR TO OPEN-SOURCE

Conclusion:

The Open-Source Contribution Workshop by IEEE-DBIT CS successfully introduced students to the culture, practices, and workflow of contributing to open-source projects. Participants learned both the theoretical importance and practical usage of Git and GitHub. Most importantly, they completed their first-ever open-source contribution, which will serve as a strong foundation for future endeavours in tech communities and software development.
