# Report on - Rocket League

**Title:** Rocket League
**Date:** 24th & 25th March 2026
**Time:** 12 PM – 4 PM & 12 PM – 2 PM
**Venue:** Basketball Court

**Target Audience:** Open for all

**No. of Participants Present:** 22

**No. of Girl Participants Present:** 7

**No. of Boy Participants Present:** 15

**Organizing Department / Committee / Authority:** IEEE DBIT

**Faculty Coordinator:** Mrs. Freda Carvalho

**Objectives:**
- To introduce participants to the working concept of Bluetooth-controlled robots in a competitive setting.
- To enhance problem-solving, precision, and control under pressure.
- To promote teamwork, sportsmanship, and technical curiosity among students.
- To make robotics approachable and enjoyable through interactive gameplay

**Outcomes:**
- Improved understanding of control logic and wireless operation of bots.
- Development of teamwork, coordination, and focus during the rounds.
- Exposure to real-time challenges involving speed, direction, and accuracy.
- Strengthened enthusiasm for robotics and automation through a playful approach.

**Detailed Report:**

The Rocket League competition, organised by the IEEE DBIT Core Team under Colosseum 2026, was an innovative and engaging event that combined gaming concepts with real-world robotics. It provided students with an opportunity to experience Bluetooth-controlled RC cars in a competitive football-style arena, emphasising teamwork, coordination, and strategic thinking. The event witnessed enthusiastic participation and successfully demonstrated how technology can be both educational and entertaining.

- The IEEE team developed Bluetooth-controlled cars using Arduino Uno and HC-05 modules to ensure uniform performance and fair play. Participants were given a brief demonstration on controlling the cars through a mobile application and were introduced to the rules and scoring system before the matches began.
- A total of 6 teams participated on Day 1, competing in a structured format. Matches were initially played in a 3 vs 3 format, followed by a 2 vs 2 tiebreaker in case of a draw, and penalty shootouts if required. Based on their performance, 3 teams qualified for the final round.
- The final round on Day 2 followed a triad league format, where the top three teams—Team Jaeden, Team Aarya², and Team Aditya- competed against each other. Each team played five rounds against the others, and the winners were decided based on the number of victories. In case of a tie, a golden kick was used as a tiebreaker.
- The matches were highly competitive and engaging. Team Jaeden emerged as the winner after securing victories against both competing teams, followed by Team Aarya² as the runner-up and Team Aditya securing third place.
- The event created a vibrant and energetic atmosphere, encouraging collaboration, quick decision-making, and technical engagement among participants. Certificates and recognition were awarded to the winning teams.
- The competition concluded successfully, highlighting the importance of innovation, teamwork, and practical application of technology, leaving participants with a memorable and enriching experience.
